The Daily Press.

HONGKONG, APRIL 10TH, 1912.

The recent announcement that Great Britain and Portugal had renewed the ancient alliance which has subsisted between them unchanged since the middle of the fourteenth century is of much interest especially in view of the rumours which have been current regarding the future of Portugal's colonies. The Premier of Portugal last month published in the Press an extract of the Anglo-Portuguese Treaty of Alliance. According to the Treaty neither party will help another nation in attacking either of the contracting Powers, or give asylum to the enemies of the other, except to political fugitives or exiles. In case of war or invasion both Powers agree to assist each other with arms, men, and ammunition when required, and will also assist in the protection of each other's colonies by sending troops or warships. Should either Spain or France attempt to make war against Portugal or her colonies, Great Britain is to intervene and endeavour to secure peace, failing which she will lend the assistance of her troops. Great Britain's reasons for "renewing" an alliance of this character are not very obvious, having regard to Portugal's decadent position, but when it is explained that what has taken place is merely an exchange of Notes confirming an ancient Treaty, it will be readily assumed that it has been done to remove any uncertainty that may prevail as to the continued existence of the alliance now that Portugal

has become a Republic. A writer in a London paper explains that in their original form the treaties were clearly as much dynastic as national, and indeed one of them—the Treaty of Windsor of 1386—definitely pledges the parties to it to help each other against their respective "rebels." In these circumstances it will be readily understood that the present Republican Government in Portugal were in some doubt as to whether the treaties had not collapsed with the disappearance of the Braganza dynasty. As a matter of fact, the writer says, the contrary view was held by His Majesty's Government, and they were fortified by a minute of Canning, drawn up in 1826, in which, besides arguing that the treaties must be interpreted by the circumstances of the time, pointed out that if the guarantee was dynastic then Portugal had virtually terminated the treaties by her alliance with Cromwell in 1654. "Nevertheless, in view of later renewals of the treaties unaccompanied by any saving clause, a doubt might well be held to subsist. Hence the necessity for the present exchange of Notes. Later on, perhaps, it might be desirable to conclude a fresh treaty superseding the old texts, and laying down clearly the obligations of the High Contracting Parties. One effect of the renewal will be to lay at rest all rumours in regard to some projected spoliation of the Colonial domain of Portugal which ignorant people have lately discussed in connection with the Anglo-German negotiations." Incidentally too, it answers a question which has suggested itself to many people in Hongkong during the past two years regarding Great Britain's attitude in regard to the seizure of Macao by Chinese troops. It will be remembered that when the Chinese agitation which arose over the failure of the negotiation of the boundaries of Macao was followed by the stationing of a large Chinese force at Chinsan, close to Macao, there were many who jumped to the conclusion that the Canton Government meditated a seizure of the territory claimed by Portugal. It was an idea widely credited among the Chinese, but that the Chinese Government ever seriously contemplated such a bold enterprise was a conjecture which, we imagine, had very little basis in fact. In any case, now that it is better known that a Treaty of Alliance exists between Great Britain and Portugal whereby they are pledged to assist each other "in the protection of each other's colonies by sending troops or warships," the rumour is not likely to be revived.

Entries close this evening for the V.R.C. sports.

Mr. W. J. Titcher, Superintendent of the Botanical and Forestry Department, and Mrs. Titcher, Headmistress of the Bellis Girls' School, left for Home on holiday yesterday by the Siberian route.

An extraordinary general meeting of the Toerango Rubber Co. was held yesterday to confirm a resolution passed at an extraordinary general meeting of the Company held on March 21st. There were present: Messrs. A. Denison, president, C. D. Wilkinson, H. W. Slade, K.O., P. Loureiro, G. H. Willis, and the secretary, Mr. E. A. M. Williams. The resolution was confirmed by a unanimous vote.

The many admirers of that talented actress Miss Florence Beech, of the Bandmann Opera Co., will be very sorry to hear, says the *Singapore Free Press*, that she is in the General Hospital here in rather a bad state, suffering from fever, consequent on the somewhat serious fall she had here, following another in Calcutta. News of Miss Beech's illness was wired to Mr. Maurice Bandmann, and he is returning to Singapore from Colombo. It was Miss Beech's illness, we understand, that caused the alteration in the order of the operas staged in Hongkong.

PRINCE WALDEMAR'S STAY IN HONGKONG.

Prince Waldemar visited a Chinese theatre on Saturday evening. Later on the same evening he attended a Chinese dinner at the Ching Tin Hotel with the German Consul, Dr. Voretzsch, and members of his staff. Amongst those invited to meet the Prince were Messrs. R. Laurens, Capt. M. Taylor, A.D.C., H. A. Siebs, F. Tse Yat, Tse Tsan Tai, Ching King Sin, and others.

On Tuesday morning the Prince inspected some of the priceless masterpieces of Mr. Tse Tsan Tai's collection of ancient Chinese paintings. The Prince took a particular interest in the paintings by Li Su Hsun, Wu Tao Tzu, Yen Li Ti, Yen Li Pen and Han Kan of the Tang Dynasty, all of which are over one thousand years old.

Prince Waldemar was accompanied by Dr. Voretzsch, who is a collector and connoisseur of Chinese art. The Prince subsequently left by the *Shingo Maru*. His Highness intends visiting Peking, Kiachow, and Japan.

RETIREMENT OF INSPECTOR LANGLEY.

To-day Inspector A. C. Langley retires on pension from the police force of Hongkong after 21 years' service. He is a most capable and popular officer and his retirement has come as a surprise to most of his friends, but the step is being taken on medical advice. He joined the force in 1891 and served four years in the water police. After passing through various stages he was appointed to the charge of the water police nine years ago, and his conduct in that difficult position has met with the approbation of his superiors and the appreciation of the community. Some four years ago he gained the fourth class medal for meritorious service and he is also in possession of the third class medal for long service.

Mr. Langley has always been interested in sport. He has been captain of the police cricket club since its inception, and he has taken a prominent part in local billiards and in local lawn bowls. He and his wife and family leave by the English mail on Saturday for the Homeland, and they will be accompanied by the good wishes of hosts of friends in and out of the force.

"THE COUNT OF LUXEMBOURG."

The repeat performance of "The Count of Luxembourg" by the Bandmann Opera Company last night attracted another large house, and the general approval of the production was as manifest as it was the previous night. There was not a dull moment from the raising of the curtain till its fall, and the many encores testified to the good work of the principals. The music is perhaps not so striking as in some of the other productions, but the waltz theme which was so predominant towards the close was very fascinating, while the dancing was picturesque and effective. There is no need to refer to the performers in detail. Everyone acquitted himself and herself with distinction, and the company may rightly regard "The Count of Luxembourg" as their masterpiece. In it everybody is so happily placed that they seemed to naturally fit the parts.

LOCAL SPORT

LAWN BOWLS.

The Police celebrated Easter Monday by a three rink match between teams representing married and single for silver spoons. The big margin obtained by Inspector Cameron's rink ended in a win for the married men by 62 points to 48. The scores were—

MARRIED.	(skip)	SINGLE.	(skip)
P. S. Pitt	15	Insp. Withers	14
Insp. McHardy	16	P. C. Stewart	17
Insp. Cameron	31	K. McLennan	47
	62		48

BILLIARDS.

Another series of games in the second round of the Soldiers' Club Billiard Tournament commenced on Thursday evening last when the Hongkong Volunteers met 83 Company R.G.A. The first game was between Captain Lammett of the Volunteers and Gunner Weatherall, 83 Co. R.G.A. The Volunteer beat the Regular by 122, making breaks of 22 (twice), 13 (twice), 26, 11, 12 and 20. Weatherall's only two-figure breaks being 14 and 10. The second game was played by Sergeant Holliday, 83 Co. R.G.A., and Corporal Bullock of the Volunteers. The former won by 30, his highest breaks being 10, 13, 12 (twice), 16 and 11. Corporal Bullock contributing 14 (twice), 10, 11, 13 and 13. Scores:—

Captain Lammett	250
Gunner Weatherall	128
Sergeant Holliday	250
Corpl. Bullock	220

HONGKONG VOLUNTEER RESERVES.

MARINE INSURANCE COMPANY RESULTS.

Analysing the statements of nine marine insurance companies, whose figures are now available, *The Times* shows that, assuming the amounts placed to suspense are sufficient to close the account, there was in the aggregate an underwriting profit for 1910 of 6.8 per cent. on a total premium income of £3,694,366, as compared with a profit of 5.4 per cent. in the previous year. The total first year payments on the 1911 account amount to 26.5 per cent. of the premium income, which was a lighter settlement than the corresponding figure for 1910.

TELEGRAMS.

[THROUGH REUTER'S AGENCY.]

THE COAL STRIKE.

SCOTCH MINERS RESUMING.

LONDON, April 9th.
With the exception of those in Fifeshire, the Scotch miners have made a general start.

LATER.

RAILWAY SERVICES BECOMING NORMAL.
The railways are resuming their normal services.

In South Wales and Durham there remain a danger at the points, owing to the discontent of the surfacemen.

PREPARATIONS FOR RESUMPTION.

Elsewhere there are most active preparations for an immediate resumption of work. A thousand were getting coal yesterday in Lancashire in spite of the holiday.

DIFFERENCES WITHIN MINERS' FEDERATION.
The meetings of miners and the speeches of their agents indicate differences within the Federation. The miners at Chirk have decided to secede from the North Wales Federation.

Mr. Spencer, the Derbyshire representative to the Conference on Saturday, addressing the miners at Alfreton said the change of front on the part of the leaders would shake the foundations of the Federation, and he was convinced that never again would there be a strike of such magnitude.

The miners at Dinnington near Sheffield have passed a vote of censure upon their leaders and have resolved to start a crusade to revise the rules for the election of officials to the Federation. On the other hand Mr. Hartshorn at Cardiff said that preparations were being made for a labour movement of greater magnitude by the union of transport workers, railwaymen, and miners. He predicted a general strike of transport workers early in the summer.

ITALY AND TURKEY.

GREEK STEAMER SEIZED.

LONDON, April 9th.

A telegram from Port Said states that the Italian subventioned merchant cruiser *Duca di Genova* has captured a Greek steamer carrying contraband, and is taking her to Tobruk.

TURKS' STRONG RESISTANCE.

The *Times* Cairo correspondent says that Edhem Pasha, the Turkish commander at Tobruk, has arrived from Tripoli. He states that the Turkish troops number 10,000, and are assisted by 200,000 Arabs. They are able to hold out for a year.

The Turks recently fired at and brought down an Italian aeroplane at Benghazi.

MR. BONAR LAW IN IRELAND.

LONDON, April 9th.

Mr. Bonar Law is en route to Belfast, where to-morrow he addresses a great anti-Home Rule demonstration. He met with a tremendous reception at Larne, where large crowds gathered, and bands played the National Anthem. The ovations were repeated at Belfast.

HOLY WAR IN TIBET.

LONDON, April 9th.

Rumours are rife among the Dalai Lama's officials at Lhasa that there has been heavy fighting between Tibetans and Chinese. It is said that Chinese soldiers attacked a Tibetan monastery near Lhasa, and that the monks retaliated vigorously. A kind of holy war is proceeding.

STEAMER'S TERRIBLE EXPERIENCE.

LONDON, April 9th.

The liner *Ontario* bound from Baltimore to Boston was battling with a gale when fire broke out at midnight in the cotton hold. The crew and the 31 passengers remained on board while the breakers were sweeping the decks till the steamer was beached on Long Island. They were rescued by a tug.

The wireless operator stuck to his post for three hours telegraphing for assistance everywhere though the flames were fifteen feet high in his cabin.

INTERNATIONAL RUGBY.

LONDON, April 9th.

The international rugby match between England and France at Paris was won by England by 18 points to 8.

BOXING.

LONDON, April 9th.

Reuter's correspondent at Sydney telegraphs that in a twenty rounds boxing contest Langford beat McVea on points. There were 15,000 people present. The betting was 10 to 9 against McVea, and it veered to 5 to 4. Langford, after the third round, fought fast and fair.

OBITUARIES.

LONDON, April 9th.

Mr. Thomas MacQuoid, the artist and painter, is dead.

The death of Emily Soldene, vocalist, actress, journalist, and novelist, is announced.

A HONGKONG WEDDING.

BOWLEY EDWARDS.

The wedding of Mr. Francis Bulmer Lyon Bowley, third son of the late Rev. J. W. L. Bowley, of Bristol, and Mrs. Bowley, of Reading, and Miss Ethel Brownen, second daughter of the late Mr. Richard Edwards, J.P., and of Mrs. Edwards of Fedwhir, Aberdare, was solemnised yesterday afternoon at St. John's Cathedral, and as the bridegroom is well-known in the Colony, having formerly acted as Crown Solicitor, and being a member of the firm of Messrs. Dennys and Bowley, the event aroused no little local interest and a large congregation attended to witness the ceremony. The church was beautified for the occasion, and the many pot plants and palms introduced lent a pleasing effect to the interior.

The service, which was choral, was conducted by the Rev. R. T. Johnson, assisted by the Rev. A. A. C. Moreton, B.N., at the organ being Mr. Denman Fuller, F.R.C.O., who played the Serenade Hoffmann before the ceremony and Chanson d'Éte by E. Lemaire afterwards.

The bride, who was given away by Mr. H. L. Dennys, senr., was charmingly attired. She wore a magnificent gown of white tulle with satin trimmings and pearl embroidery, as well as a train of satin and pearl embroidery with bows of ribbon fastening from the left shoulder to the waist. The old lace veil worn by the bride was lent by her mother. The bride's bouquet comprised a sheaf of beautiful arm lilies. The four bridesmaids were Misses Vivienne Dennys, Esme Scott Harston, Betty Harvey and Sheila MacMunn. They wore white satin dresses trimmed with silver, and carried crooks adorned with pink roses and violets tied with pink and mauve ribbons. Mr. Bulmer Johnson, cousin of the bridegroom, acted as best man. The happy couple left the church to the strains of Mendelssohn's Wedding March and a merry chime was sounded on the bells as the party entered the church for the Feast of 'Belvidere.' A reception was held, at which the health of Mr. and Mrs. Bowley was proposed. The honeymoon is to be spent in Japan.

Among the presents received are the following:—

H.E. Sir Frederick Lugard and Lady Lugard—Silver cruet.

Capt. and Mrs. Addison—Lacquer salad bowl.

Mr. and Mrs. C. G. Alabaster—Silver toilet service.

Mr. and Mrs. Aston—Silver toilet service.

Mrs. and Miss Aston (Cheltenham)—cake basket.

Dr. Dalrymple Allen—Silver salt cellars.

Hon. Mr. C. J. Badley, Hon. Mr. C. McL. Messer, Mr. J. B. Wood and Mr. C. M. Melbourne—Silver bowl.

Mr. J. Barton—Crystal jug.

Mr. and Mrs. E. M. Barton—Embroidered tea cloth.

Capt. and Mrs. C. J. Benton—Liquor pot.

Mr. A. Beattie and Mr. M. P. Beattie—Silver vases.

Mr. Francis Benton—Silver vases.

Mr. and Mrs. Beath—Silver menu holders.

Capt. and Mrs. H. I. Black and Misses Robinson—Biscuit box.

Dr. and Mrs. Black—Liquor cups and stand.

Dr. and Mrs. Bell—Ivory frame.

Mr. and Mrs. Blanch—Bronze vase.

Mr. and Mrs. H. W. Bird—Silver coffee spoons.

Mr. and Mrs. L. G. Bird—Silver dishes.

Mr. and Mrs. Bonnar—Silver tea knives.

Mrs. Bowdler—Silver vases.

Capt. and Mrs. Bowen—Embroidered table cloth.

Mr. A. Bryer—Blackwood and silver tray.

Mrs. Bowley—Dining room clock.

Mr. and Mrs. A. L. Bowley—Bedspreads.

Mr. C. W. Buyers—Crystal dish.

Mr. C. Browne—Silver finger bowl.

Miss L. Bryer—Silver photo frame.

Mr. J. M. Beck—Silver pin box.

Mr. W. L. Carter—Silver frame.

Hon. Mr. and Mrs. Chatham and Mr. and Mrs. Wolfe—Silver sauce bowls.

Mr. and Mrs. A. F. Churchill—Brass tray.

Dr. F. Clark—Blackwood stool.

Hon. Mr. C. Clement—Picture.

Mr. and Mrs. D. W. Craddock—Silver sweet dish.

Mr. and Mrs. Stanley Cooke—Embroidered tea cloth.

Mr. and Mrs. Crofton—Clock.

Dr. J. H. Coole (Fochow)—Lacquer and napkin ring.

Master Denis Crofton—Pencil case.

Chinese Staff (Dennys & Bowley)—Silver centrepiece.

Mr. and Mrs. Cunningham—Silver tea strainer.

Mr. T. Dallin—Silver inkstand.

Dr. and Mrs. David (Pontypridd)—Brooch.

Mr. and Mrs. Davis—Silver dish.

Mr. Edgar Davidson—Silver finger bowl.

Mr. and Mrs. H. L. Dennys—Silver fruit dishes and table glass.

Mr. H. L. Dennys, Junior—Silver sweet dishes.

Mr. and Mrs. Denison—Silver bowl.

Mr. and Mrs. W. H. T. Davis—Present.

Mr. and Mrs. Dowley—Candelsticks.

Mrs. Davies (Drygolwg)—Silver vases.

Mr. and Mrs. Dymond (Hereford)—Old china.

Mr. and Mrs. Edkins—Silver cruet.

Mrs. Edwards (Fedwhir)—Cheque.

Mr. W. Edwards, Mr. O. T. Edwards and Mr. A. Edwards—Brooch.

Capt. and Mrs. Engledeu—Jewel box.

Mrs. Elge—Silver sweet dishes.

Miss Eys—Embroidered tea cloth.

Tenants of Fedwhir Estate—Silver bowl.

Mr. H. G. Fisher—Silver vases.

Dr. Fitzwilliams—Silver dishes.

Mr. Denman Fuller—Book.

Mr. and Mrs. Griffiths (Merthyr)—Cheque.

Capt. and Mrs. Guthrie—Embroidered tea cloth.

Mr. and Miss Gibbs—Barograph.

Hon. Mr. H. J. Gompertz—Bronze lantern.

Mr. and Mrs. Gale—Embroidered tea cloth.

G. F. S. (Lwydded)—Prayer Book.

Mr. and Mrs. E. R. Hallifax—Blackwood stands.

Mr. and Mrs. H. Hancock—Silver cruet.

Mr. and Mrs. Reader Harris—Silver crumb scoop.

Dr. and Mrs. Montagu Harston—Silver sauce boat.

Mr. and Mrs. Scott Harston—Silver cake dish.

Mr. and Mrs. R. D. Harvey—Brass lanterns.

Colonel Gordon Hall—Cruet stand.

Mr. C. N. Hamilton—Silver cruet.

Rev. and Mrs. Hickling—Hainan ware.

Capt. and Mrs. Harvey—Brass tray.

Mr. and Mrs. Geo. Hogg—Silver toast racks.

Mr. H. K. Holmes—Gold pencil case.

Mr. and Mrs. P. M. Hodgson—Silver menu holders.

Mr. and Mrs. Hornby—Bronze vase.

Miss Inness—Blackwood frame.

Colonel and Mrs. Irwin—Vase.

Mr. F. R. Johnson, Miss Johnson and brothers—Sleeve links.

Mr. and Mrs. A. B. Johnson and the Misses Johnson—Cigar box.

Mr. C. Bulmer Johnson—Silver butter dish and cruet.

Rev. F. T. Johnson—Silver salt cellars.

Rev. and Mrs. Richard Jones (Trecynon)—Book.

Dr. and Mrs. Jordan—Travelling clock.

Mr. Janssen—Silver scent bottle.

Mr. and Mrs. Kemp—Clock.

Major and Mrs. Lyddon—Silk tea cloth.

Mr. E. Lyddon (Penarth)—Present.

SANITARY BOARD.

The fortnightly meeting of the Sanitary Board was held yesterday. There were present, the President (Mr. E. D. C. Wolfe), Hon. Mr. W. Chatham, C.M.G., Director of Public Works, Hon. Mr. E. R. Hallifax (Registrar-General), Col. Irwin, Dr. Fitzwilliams, Mr. Ng Hon Tsz and Dr. F. Clark (Medical Officer of Health).

Relative to a letter from the Colonial Secretary's Office, regarding the report on a bacteriological examination of the public water supplies.

Mr. BOWLER intimated—"The letter from the Government is no reply to the question propounded, which was, 'where were the samples in the attached report, referred to, actually taken?' Refer back for categorical reply."

Dr. FITZWILLIAMS intimated—"Unsatisfactory" and "extra" were the samples of water, reported upon, taken from this point.

The Hon. DIRECTOR OF PUBLIC WORKS intimated—"The following should have preceded the statement in my minute of 12th March, 1912: 'The unfiltered samples were taken from the filter beds, and the filtered samples were taken from a point in the main leading from the filter beds to the service reservoir, immediately adjoining the filter beds. The minute should stop at the word 'stated.'"

Dr. FITZWILLIAMS—"The real question is whether these samples were taken from the regulation places."

Hon. DIRECTOR OF PUBLIC WORKS—"It was."

The matter then dropped.

THE MAGISTRACY.

For returning from banishment a Chinese was yesterday sentenced to six months' imprisonment.

For bringing two dead pigs into the Colony on Monday contrary to the Colonial regulations a Chinese trader was yesterday fined \$25.

A Chinese was yesterday convicted by Mr. Melbourne of having given false testimony in a case heard before his Worship on Monday, and a fine of \$2 or five days' imprisonment was imposed.

Three Chinese were brought up on remand charged at the instance of L. S. Wills with having stolen a junk from Sham Sui Po on the 30th March. They were again remanded until Wednesday.

Ten strokes with the birch and 48 hours' detention was the sentence passed by Mr. Irving upon a Chinese youth 14 years of age who had been convicted of stealing a quantity of brass screws from the Naval Yard.

F. L. Picard, who is charged with forging a cheque for \$120 upon the Yokohama Specie Bank in the name of Mr. Vernon of Macao, appeared yesterday before Mr. Irving, the case being again remanded until Wednesday.

When the *Tamara Maru* arrived in port on Monday she had on board seven Chinese stowaways whom the captain had discovered on the downward voyage in the forepeak water tank. They were brought before Mr. Irving yesterday charged with having stowed away from Hongkong, and a Japanese seaman was also charged with having aided and abetted them. The Nippon Yusen Kaisha withdrew the charge against the stowaways as part of the passage had been paid, and the charge was withdrawn against the Japanese seaman on the understanding that he would be taken to Japan to be dealt with by the Japanese Government.

Yesterday the master and three of the crew of a stone junk were placed before Mr. Irving on a charge of being in the unlawful possession of a quantity of cable and an anchor. The police had received information that the junk had been seen under suspicious circumstances off Tai Kok Tsui with 300 pounds of anchor and 270 feet of 3 inch cable on board valued at \$905. The master failed to give a satisfactory account of the metal, and the junk was seized by L. S. Wills, who yesterday prosecuted the master and three of a crew with the larceny of the anchor and cable from the steam lighter *Fatho*, which was burned to the water's edge behind Stonecutters Island in August last. The master was sentenced to three months' imprisonment and the crew were discharged.

Mr. Melbourne was called upon yesterday to investigate a charge against a Chinese named Li Sang of having thrown a corrosive fluid upon a blind singing girl on the 2nd inst. The complainant, who is 22 years of age, was accompanied by her amah on the day in question, and it is alleged that defendant, who is her adopted mother's son, threw a corrosive fluid at her as he was passing. Fortunately, it missed her face, but went over her neck and shoulders, burning her clothing, and causing three wounds on her neck. She was taken to the Tung Wah Hospital, where her injuries were attended to by Dr. Tso. Mr. E. Davidson, of Messrs. Hastings & Hastings, appeared for the prosecution, and Mr. Crowther Smith appeared for the defence. The hearing was adjourned.

THE PHILOSOPHY OF BONAPARTE.

The Paris correspondent of the Daily Telegraph writes:—"The collection of *parades* gathered by the industrious M. J. Bertant from the literary works of Napoleon I. give an excellent idea of the Emperor's mastery of incisive phrase, and his keen intuition. Here are some of his axioms on war:

"There are two kinds of plans of campaign—good and bad. The good are nearly always wrecked by unforeseen circumstances, which often cause the bad to succeed."

"Inevitable wars are always just. Imagination loses battles. Warfare is a natural style."

"In war there is only one favourable moment; genius knows how to seize it."

"There are cases in which squandering men economise blood."

"An army is a people that obeys."

"Courage is like love; it feeds on hope."

"Fearless people are not found among those who have something to lose."

"Dare-devilry is an innate quality; it is in the blood, and often merely impatience of danger. Courage is the result of thought."

"I have an income of 100,000 men!"

"But, of course, Napoleon's interests were not entirely absorbed by war. He has left some maxims relating to the drama and literature:

"There is merely the embroidery on the drama of a cloth."

"A good tragedy gains in value every day. High tragedy is the school of great men, and it is the duty of Sovereigns to encourage it. To judge tragedy it is not necessary to be a poet; it is sufficient to know men and things."

"Tragedy should be the school for kings and peoples; it is the highest point to which a poet can attain."

"Dramas are the tragedies of chambermaids."

"What I admire in the 'Agamemnon' of Eschylus is the extreme force united to great simplicity. I am particularly struck by the degrees of terror which characterise the productions of this father of tragedy."

"Tartuffe" is the production of a masterly hand, but it has such a character that I do not hesitate to say that if it had been written in my time I would not have permitted it to be performed."

"Beaumarchais: a man without morals, without principles; a pedlar of literature rather than a man of letters. I would have clapped him into prison; I should have been called a tyrant, but what a gain to society!"

"Here are a few political maxims, and some thoughts on love."

"Blockheads talk of the past, wise men of the present, fools of the future."

"A Prince ought to suspect everybody. Those who can no longer be rewarded must be disgraced."

"A throne is only a plank covered with velvet."

"Kingship in these days is no child's play; the habits of Kings must change with those of the people; to have the right to serve people one must begin by serving them well."

"Republics are not made out of old monarchies."

"A revolution is an opinion supported by bayonets."

"Charles I. perished for resisting, Louis XVI. for not resisting; neither understood the force of inertia, which is the secret of great reigns."

"Then learn that a nation can live without bread I shall believe that the French can live without glory."

"You may kill the Turks; you will never conquer them."

"In the battle of love, flight is the only victory."

"Love is the occupation of the idle man, the distraction of the soldier, the stumbling-block of the Sovereign."

"Love is a stupidity à deux."

SALE OF ARMS IN CHINA.

In the House of Commons on the 20th ult., Mr. C. Bathurst (Wilts, Wilton, U.K.) asked the Secretary of State for Foreign Affairs whether, in view of the fact that hostilities in China had now ceased and that German, Japanese and other foreign traders were doing a large business in the sale of arms and ammunition to the new Chinese Government, he proposed now to remove the restrictions which were imposed last November by the British Government upon the importation by British subjects of munitions of war, and so put British commerce in this respect on an equality with that of other nations.

Sir E. Grey—"I am not aware that any restrictions have been imposed such as the hon. member mentions. His Majesty's Government have gone no further than to offer advice to British subjects not to take part in the trade in arms and ammunition during the revolutionary struggle in China, as such participation was likely to create difficulty with one or other of the parties engaged in that struggle and to be detrimental to British interests. I have no knowledge of any case in which this advice has been given since the issue of the Edict announcing the abdication of the Emperor."

SIMPLIFIED CHINESE WRITING.

80,000 CHINESE SIGNS REDUCED TO 42!

Professor Rivetta, of the "Orient Institution" at Naples, has compiled a Chinese alphabet which, a Rome correspondent says, it is hoped the Republic will sanction. Hitherto 80,000 signs served to form the 80,000 words of the language, and it is not astonishing that the number of literates in the Celestial Kingdom were few. In order to reproduce all the sounds of the Chinese tongue Professor Rivetta had recourse to every alphabet now existing. He has made one which comprises 42 letters, of which 23 are vowels and 19 consonants. Among the vowels, four are taken from the Greek, four from the Russian, five from the Latin, three from the Chinese, two are lengthened vowels, and seven are reversed letters. Of the consonants fourteen are Latin, three Russian, and two Greek. The new alphabet enables very word of the universally current Chinese language to be correctly written. It has already been adopted in Southern China. [Where?—Ed.]

NOTES AND NEWS.

HOBBLE SKIRT CAUSES ACCIDENTAL DEATH.

A verdict of accidental death was returned at the inquest at Davenham on the body of Mrs. Ethel Hawley Lindley, the wife of a retired Manchester cotton manufacturer, of Davenham Cottage, Northwich. While taking a constitutional, and wearing a hobble skirt, Mrs. Lindley climbed a stile, and was subsequently found with her leg broken in two places, and the bone protruding. Septic poisoning supervened, and the leg was amputated, but death occurred from heart failure. The coroner said that he had the greatest respect for ladies and their dresses, but he wished that when they took country walks they would not wear hobble skirts.

THE MEN OF MARS.

M. Edmond Perrier, the director of the French Botanical Society, in an amusing interview recently declared that there is no doubt at all that there are plants and flowers on Mars, and that the planet is inhabited. He has published a little pamphlet in which he describes on scientific grounds the Martians as he believes them to be. "Owing to the lightness of the atmosphere on Mars and the comparative absence of direct light, M. Perrier believes the Martians to be luxuriant, and the Martians people like giant Scandinavians. They are, he thinks, about twice the size of human beings, have enormous noses and large protruding eyes. Their eyes are probably blue, their hair almost white; they have no necks, no waists, have very prominent ears, and their large heads and bodies are supported by very thin legs and very small feet."

LAWYER'S WRONGLY DRAWN WILL.

Mr. Vernon Lushington, K.C., of Kensington-square, W., at one time Judge Advocate-General, afterwards Secretary to the Admiralty, who died on January 24, aged 69, left estate valued at £10,560 gross, with net personality sworn at £19,396. His will dated November 1st, 1906, and a codicil of April 11th last, both drawn by himself on separate sheets of notepaper, were not properly attested, and in each case an affidavit by the attesting witnesses of due execution was required before the documents were admitted to probate. Mr. Lushington thus added another to the company of eminent lawyers who have failed to draw correctly their own wills, for Lord St. Helier (who for many years, as Sir Francis Jeune, was president of the Probate Court), Mr. Henry Stephens, K.C., Lord Brimthorpe, Sir John Bickart, formerly Solicitor-General, Lord Brougham, and Lord Lyndhurst (both Chancellors), have all erred in this respect.

VERY EVIL EYE.

The *Hindu Spiritual Magazine* publishes an article upon "The Practice of Gaze." Mr. C. S. Surya Prakas Rao says that the impossible becomes possible to the man who has practised steady gaze! A French peasant, he says, was able to kill small birds by steadily looking at them. But the most striking story is that of an opera singer named Massol, who, under the Second Empire, was a great favourite with the public. Although he was a man of small intellect he had a wonderful voice and an eye which slew. One of his greatest successes was his rendering of the "Curse" aria in an opera called "King Charles VI." During the singing of this aria (says the *Review of Reviews*), if his eye fell accidentally upon any one in the audience or on the stage, that person died. After he had killed a scene shifter, the leader of the orchestra, and an unfortunate merchant from Marseilles, the opera was excluded from the repertoire. The writer of the article says the science and practice of "the gaze" is known among the Hindus as "Trataka Yoga." The practice of the gaze gives you whatever you can desire.

THE DEAREST FOOTMAKER.

A Paris correspondent of a London paper writes:—"The creation of a school of artistic shoe-making is the dream of one of the most original tradesmen in Europe, whom I have discovered at his workshop on the top floor of a house in the Place Vendôme, Paris. This artist in footwear, who is a Sicilian named Paolo Yatoray, proudly styles himself the dearest bootmaker in the world, and the title is justified by the following six rules handed to every visitor to his atelier:—
1.—A last is made for every client.
2.—Experimental boots and shoes are provided until complete satisfaction is given and are at the cost of the house.
3.—Prices vary from £1 a pair.
4.—The order consists of (a) 10 pairs of boots and shoes, (b) 10 pairs of trousers with 60 pairs of silk stockings or socks, (c) a special travelling shoe trunk.
5.—A deposit of £120 to be made.
6.—Terms cash down.
The deposit of £120 is the preliminary to all business with Yatoray, and he will only serve clients who have leisure to devote to the all-important business of being fitted.
He makes the last from a block of mahogany with his own hands, does all the cutting out and modelling of the shoe, and only has the assistance of a couple of workmen for sewing on the soles. He often spends weeks over the last seeking to reproduce with the fidelity of an artist the exact line of a client's foot. One pair of shoes after another is furnished to the client and destroyed until an exact fit is obtained. While the shoes are being made special stockings or socks of the finest web are being woven, for the master bootmaker insists that if a stocking is only the sixteenth of an inch too long the fit of the shoe is spoiled. This original bootmaker has on his books several royalties and some of the smartest women in England and America. He never advertises. He took a shop in Bond-street during the Coronation week to show London what Paris could produce in the way of shoes, but declined to take any orders."

QUEEN OF SIAM'S JEWELS.

STORY OF PURCHASE FROM A CHINESE GAMBLER.

At Bow-street Police Court on the 15th ult., Jules Paul de Roseck, alias Paul de Buseck, 31, described as a journalist, was charged on remand under the Fugitive Offenders Act with feloniously receiving jewelry which had been stolen at Bangkok while in course of consignment from London to the Dowager Queen of Siam.

Mr. Bodkin and Mr. Roome appeared for the prosecution.

Chief-Inspector Bower, of Scotland Yard, stated that on February 9th the prisoner read the depositions which had then been received from Singapore. Referring to the statement that two large pearls had been deposited by him with Michael Sidney Cowan, of the Arcade, Singapore, as security for an advance of \$800, he said it was not correct. It was a book debt in respect of racing. He did not dispute that he handed Cowan two pearls, but he disputed their identity.

A written statement by the accused was read by Mr. Bodkin as follows:—

"About the middle of June, 1909, I was in the Government gambling house at Bantawal, Bangkok, Siam, with some other Europeans. As usual, I met in this den several of the Chinese clerks and others belonging to the steamers in my charge. The gambling house is situated close to the landing stage and, in fact, almost opposite my bungalow. I left the gambling house about 5 p.m., and play having as was commonly the case, run high, I retired a winner of some 2,000 ticals (£150). It was universally known among those on board that I, as wharf superintendent, lent money locally on trading goods and jewelry. I made a profitable side business by this."

The statement proceeded that a krani (steamer's clerk) who had lost heavily at the gambling house applied to the accused for a loan of 2,000 ticals, on the security of a small box of pearls. He lent him 920 ticals, on that security, and received a receipt for 1,000 ticals. On the following morning the man told him that he had lost all this money and asked him if he would buy the pearls. He (the defendant) asked him where the pearls had come from, and the man then admitted that they were stolen, but he did not say who the owner was. "I understood it was part of a cargo. I gave him another 500 ticals and the pearls became mine by purchase."

SIAMSE POLICE CORRECTION.

"My object in not informing the police of the occurrence was threefold—(1) I feared the worry and annoyance the matter would cause me, as I was in a very bad state of health. I was suffering from facial paralysis and brain trouble, due to the climate, opium, and other causes; (2) it was only a little while back that I made a continued attack in the Press on the police and the rottenness of the system. This caused a radical change to be made, one of the Royal Princes who was then in charge being transferred to another department; (3) it was a notorious matter that stolen property was dealt with with impunity, the native police usually retaining it, when seized, for their own private benefit and rarely restoring it to the rightful owners."

Mr. Reginald Smith, a director of the Association of Diamond Merchants and Silversmiths (Limited), Charing-cross, stated that on April 13th, 1909, his firm received an order for a rope of pearls and other articles from Mr. Chong Kwa, the King of Siam's Chamberlain. Witness packed the things in the specially made box (produced), the zinc lining of which was soldered down, and the outer covering was sealed with four seals. Witness afterwards took the box to Southampton and handed it over to the agent of the North-German Lloyd Line for consignment to Bangkok. Witness joined the vessel, on which the jewelry was consigned, at Genoa and travelled by it to Singapore, afterwards proceeding by another vessel, the *Delhi*, to Bangkok. The box did not come into his possession again after he parted with it at Southampton. The contents, which were of the value of £8,200, were insured at Lloyd's. A few hours after his arrival at Bangkok witness was visited at his hotel by Mr. Chong Kwa, who brought the box with him. The seals had then been broken, and the zinc lining was out in two places. All the jewels were missing with the exception of a few brooch pins. Next morning Lloyd's agent, the Chief of Police, and the prisoner called at the witness's hotel. The prisoner then said that the box was carried from the captain's cabin on the *Delhi* to the wharf.

Mr. Samuel Smith, governing director of the Association of Diamond Merchants and Silversmiths, gave evidence identifying the description of the pearls which he had purchased in Paris three weeks before they were despatched. The weight of the largest pearl was just over 19 grains.

The Magistrate committed the prisoner to the Straits Settlements for trial.

COTTON TRADE PROSPECTS.

Mr. William Tattersall, of Manchester, in his cotton trade circular issued on the 15th ult. states that the prospects in the industry remain healthy. The recent rather quieter feeling as regards fresh business is causing no anxiety whatever. Contract lists in both yarn and cloth are of an extensive character, and machinery is working at a substantial margin of profit. Large supplies in the raw material are assured throughout this year.

According to an analysis of the stock-taking results of six large spinning companies for the past three and six months, the profit on share capital, after allowing interest on loans, is 17.74 per cent. per annum, whilst the profit on share and loan capital combined is 13.69 per cent. per annum.

The activity in the weaving branch of the trade is resulting in more extensions, and during the past month several new projects have been arranged for. If the present movement continues it may not be long before the fresh looms put down will balance the excess of spindles during the last few years.

THE LATE MR. ARTHUR SASSOON.

The *Times* in announcing the death of Mr. Arthur Abraham David Sassoon last month from heart failure said:—

Mr. Arthur Sassoon was born on May 26th, 1840, his father being the late Mr. David Sassoon, of Bombay. He spent the earlier years of his life in India and China, after which he became associated with the firm of David Sassoon & Co., of Leadenhall-street, of which he remained a director until the time of his death. Mr. Sassoon was also an uncle of Sir Edward Sassoon, M.P., a half-brother of the late Sir Albert Sassoon, and a brother of the late Mr. Rauben Sassoon. He married, in 1873, Eugénie Louise, daughter of the late Achille Perugia, of Trieste, and a sister of Mrs. Leopold de Rothschild. Mr. Sassoon was better known in society than in the City, for he retired from business between 30 and 40 years ago, and had since devoted himself entirely, except for his director's duties, to social affairs. His great wealth enabled him and Mrs. Sassoon to entertain considerably, both at their villa at Hove and at Tulchan Lodge in Scotland. Mr. Sassoon was honoured with the friendship of the late King Edward, who, as Prince of Wales and afterwards as King, frequently visited him at Brighton, while King George was his guest last autumn at Tulchan Lodge for grouse shooting. King Edward conferred on him the C.V.O. in 1903.

Mr. Sassoon was a man of scholarly tastes and wide reading. He knew Hebrew, Hindustani, and Arabic, and he knew the Bible perfectly. It was his habit to read *The Times* through from beginning to end every day, and he was remarkable for the accuracy of his information. He was looked up to and loved by all the members of the family of which he was the head. Throughout his life he was extremely kind-hearted and charitable, but all his almsgiving was done so privately that nobody ever knew the extent of his generosity. He was most hospitable, and never so happy as when entertaining guests. He lived for the most part quietly at Brighton or in Scotland, occasionally varying this by giving an entertainment at his house at Albert-gate.

The *Poll Mall Gazette* said:—

The late Mr. Sassoon was perhaps more frequently the host of Royalty during the past ten or twelve years than was any other member of that small section of society that circles round Buckingham Palace. At his fine house in Albert Gate, at Tulchan, the beautiful Seafeld property in Banffshire, and at the big house at Hove, the late King was an annual guest.

That same big house at the corner of King's-square, Hove, is invested with some historic interest, as it was there that his late Majesty had a famous interview with a certain statesman in which the latter did not have the best of it. During King Edward's visits to Hove the authorities prevented indiscreet sightseers from taking up their positions on the benches opposite Mr. Sassoon's house by the ingenious method of freshly painting the coveted seats every morning.

Both as King and as Prince of Wales his present Majesty has paid autumn visits to Tulchan, that sportsman's paradise, where the shooting and the fishing are unequalled. Tulchan Lodge has been practically rebuilt by the late Mr. Sassoon, and inside it is the last word of latter-day luxury—which cannot be said of the generality of country houses north of the Tweed.

Mr. Sassoon was a brother of the first baronet of his name, regarding whom the following limerick used to be in circulation:—

Sir Albert Abdullah Sassoon,
That Indian auriferous coon,
Has bought an estate
In the street called Queen's Gate,
And will enter upon it in June.

The Sassoons, of course, came from Bombay.

Many of the papers speak of Mr. Sassoon's death as having taken place at "Ascot." It should, of course, have been, "Ascot," the residence of Mr. Leopold de Rothschild at Leighton Buzzard.

PENANG CHAMBER OF COMMERCE.

PROSPECTS OF THE TIN AND RUBBER INDUSTRIES.

At the Penang Chamber of Commerce annual meeting, Mr. Macbain, presiding, said the year might be considered good, although the volume of business fell off somewhat towards the close. Prices of produce generally kept at a high level throughout the year. With tin in the neighbourhood of \$80, copra \$11, and black pepper \$20, producers thereof must have done uncommonly well. The enhanced price of tin in the natural course of events might have been expected to bring out increased supplies, but that had not proved to be the case. The monthly official reports pointed to a reduced production and despite the attractive prices the year's shipments were practically identical with those in 1910. With more modern methods of mining and fresh fields to exploit in the northern states it was confidently to be hoped the falling off in production would be arrested.

The principal industry conserved for years to come, rubber, could scarcely be called as yet an article of commerce locally. But with rubber at 5/7½ the proprietor of a well-managed estate, whether individual or company, had wealth staring him in the face. Given good markets for produce it followed that the consequent increased purchasing power means likewise a good import trade. The year under review had proved no exception to this rule. The important business was satisfactory, the failures few and of little importance. He believed the bazaar was in a sounder condition than for a long time past.

The Chamber had again addressed Government on the subject of a wireless station at Penang, but had not yet elicited any response. The port's imports for the year had increased by \$33 millions dollars and the exports by 17 millions.

FRANCE AND THE NEW CHINA.

FESTIVAL LUNCHEON IN PARIS.

Writing on March 14th the Paris correspondent of *The Times* said:—
This morning the new flag of the Chinese Republic, which combines the five colours red, yellow, blue, white, and black, was displayed for the first time from the windows of the Chinese Legation. A luncheon was given at the Hôtel Continental in honour of the new Republic under the auspices of the Chinese Republican Committee in Europe, the president of which is Wu Tsung-lien, the diplomatic representative of China in Rome, and the Chinese-French Union, over which M. Painlevé, one of the Deputies for Paris, presides.

M. Painlevé, who occupied the chair, toasted the Chinese Republic, and delivered an eloquent address on the awakening of China and on the influence of the principles of the French Revolution. Wu Tsung-lien, in his reply, eulogized Sun Yat-sen as the masterly organizer of the Chinese revolution, and paid a tribute to his act of self-sacrifice in supporting the election of Yuan Shih-kai as the first President of the new Republic. He emphasized the essentially pacific character of Chinese aspirations and dwelt upon the necessity for developing the immense natural resources of the country.

M. Anatole France also spoke, and said that he "saluted the birth of liberty in China." He was convinced that amid the uncertainties and troubles of the present times an era of universal peace was being slowly evolved.

MIRIBILE DICTU!

We take the following from the *Peking Daily News*, a paper published in English by Chinese:—
It is reported that copper cents are scarce in the northern part of Kiangsu. The Military Governor of Kiangsu reports that one dollar can be exchanged for only one hundred copper cents. Delegates have been sent by order of the Board of Finance at Nanking to make an investigation.
The italics are ours. Comment is superfluous.

If You Wear
TORICS

you know you have the best. If you do NOT, you have not yet done the best. You can give your eyes comfort. It is possible to correct the vision of eyes that need glasses without using TORIC LENSES. It would also be possible to use a motor-car without pneumatic tyres, but it would not be so comfortable. If you have failed to find real eye comfort, try a pair of TORICS. The deep inner curve conforms to the natural motions of your eye. Their advantage is particularly noticeable to players of tennis, golf, cricket, and billiards. Made in clear glass and tinted shades.

COMPANY REPORTS.

UNION INSURANCE SOCIETY OF CANTON, LIMITED.

The report of this Company is now published and reads as follows:—
The Board has now to lay before the shareholders a balance sheet containing a summary of the property and liabilities of the Society on the 31st December, 1911, and a statement of accounts to the same date.

1910 Account.—After payment of the interim dividend of \$30 per share and the bonus of 20 per cent. to contributors passed at the last annual meeting there remains a balance of \$874,294.25 as per annexed statement.

The Board recommends that this sum be appropriated as follows:—

A final dividend to shareholders of \$20 per share on 12,400 shares	\$248,000.00
An addition to the Sterling Reserve Fund of \$10,000 at Exchange 1/10 5-16	107,563.03
To be carried forward to Underwriting Suspense Account to close the account for the year 1910	518,731.22
	\$874,294.25

1911 Account.—The balance of working account on the 31st December, 1911, was \$2,344,556.27 as per annexed statement.

The Board recommends that an interim dividend of \$30 per share be paid to shareholders, absorbing \$372,000.00, and that a bonus of 20 per cent. be paid to contributors, absorbing about \$250,000.00, and that the remainder be carried forward.

DIRECTORS.

Since the last general meeting Mr. E. Orniston, Mr. C. R. Lenzmann and Mr. G. Balloch have resigned their seats and Mr. W. L. Pattenden, of Messrs. Gilman & Co., and Mr. F. H. Armstrong, of Messrs. Reiss & Co., have joined the Board.

In accordance with clause 80 of the Articles of Association Mr. Fr. Lieb and Mr. G. Friesland retire, but offer themselves for re-election.

AUDITORS.

Messrs. W. Hutton Potts and A. R. Lowe retire, but offer themselves for re-election.

H. A. SIEBS, Chairman.

Hongkong, 8th April, 1912.

Auditors' Report.—We report that we have examined the accounts of the Society at the Head Office with the books and vouchers in Hongkong and returns received from the various Branches and Agencies for the year ending 31st December, 1911. We have also satisfied ourselves as to the existence and value of the Securities for Investments, the cash at Bankers and on Mortgage to the amounts specified. We have obtained all the information and explanations we have required, and in our opinion the above balance sheet is properly drawn up so as to exhibit a true and correct view of the state of the Society's affairs according to the best of our information and the explanations given to us, and as shown by the books of the Society.

W. HUTTON POTTS } Auditors.
A. R. LOWE, C.A. }
Hongkong, 8th April, 1912.

CHINA TRADERS' INSURANCE COMPANY, LIMITED.

The report of this Company is as follows:—

The Board has now to lay before the shareholders a balance sheet containing a summary of the property and liabilities of the Company on the 31st December, 1911, and a statement of accounts to the same date.

1910 Account.—After payment of the interim dividend of \$4 per share and the bonus of 20 per cent. to Contributors passed at the last annual meeting there remains a balance of \$428,754.82 as per annexed statement.

The Board recommends that this sum be appropriated as follows:—

A final dividend to shareholders of \$4 per share on 24,000 shares	\$96,000.00
An addition to the Sterling Reserve Fund of \$10,000 at exchange 1/10 5-16	107,563.03
To be carried forward to Underwriting Suspense Account to close the account for the year 1910	225,191.79
	\$428,754.82

1911 Account.—The balance of Working Account on the 31st December, 1911, was \$1,245,287.24 as per annexed statement.

The Board recommends that an interim dividend of \$4 per share be paid to shareholders, absorbing \$96,000, and that a bonus of 20 per cent. be paid to contributors, absorbing about \$125,000, and that the remainder be carried forward.

Since the last General Meeting Messrs. E. Orniston, C. R. Lenzmann and G. Balloch have resigned their seats on leaving the Colony, and Mr. W. L. Pattenden, of Messrs. Gilman & Co., and Mr. F. H. Armstrong, of Messrs. Reiss & Co., have joined the Board.

In accordance with Clause 79 of the Articles of Association Mr. Fr. Lieb and Mr. G. Friesland retire, but offer themselves for re-election.

AUDITORS.

CURING DISEASE.

BY PROPER FOOD.

Every thinking man must be impressed by the fact that the modern doctor is relying less and less on the administration of drugs for the cure of the ordinary illnesses of life, and more and more on the selection of proper food. As a matter of fact, this idea is not so new as it seems for it has been advocated for hundreds of years—for Thomas Sydenham, who was called the "English Hippocrates," and lived in the seventeenth century, wrote: "There are not a few diseases which can be cured by the use of proper diet alone." In treating disordered and diseased conditions by food, there are two facts to be observed. The first is the elimination of foods which are found to be injurious to the individual, and the second is to supply him with food which he can digest with ease and assimilate without trouble, food which will nourish him so completely that his weakened system will rapidly gain strength. Moreover, this food, being of a bland nature, must put no strain on the organs of excretion, whose mission is to keep the blood pure.

Among such foods, milk takes a high place. There are, however, grave drawbacks to its use.

In the first place, it necessitates the taking of a quantity of fluid which, in itself, may greatly disturb the digestion.

In the second place, it is by no means easy to get pure milk in hot countries.

In the third place, in order to preserve the milk it is frequently mixed with chemicals, like boracic acid. This is exceedingly liable to cause indigestion in adults and certain to do so in children, while many people find it disagrees with them in other ways.

MANY DEVICES FOR CURE.

Many methods have been devised for overcoming these difficulties, and dried milks of various kinds have been recommended to be used.

It is constantly found, however, that the sufferers in warm climates need something more than milk products to sustain their health and strength. The reason is that their nervous system is constantly affected through the too rapid using up of the phosphorus units which play so powerful a part in maintaining the health of the nervous system.

The pre-eminent need of such people, and, indeed, of most people who live in hot countries, is a food which combines the nutritive qualities of pure milk with the energising and nerve-building properties of phosphorus. These two elements, however, are almost quite useless if merely mixed together, for the ordinary digestion and make the phosphorus lose its state worse than his first. The phosphorus must be in what doctors call the "organic" form, and it must be "chemically combined" with the milk in order to be easily digested and to produce its best results.

It is in this form that these elements exist in Sanatogen, which, to quote an article published in *The Medical Press and Circular*, "has strengthened the physician's hand a hundredfold," while, it adds, "the wonders brought about by it are no less manifold than amazing, and have been testified to by leading physicians whose names are as household words in many countries of the world."

THE BEST METHOD.

Sanatogen, in fact, has come to be recognised by the best doctors everywhere as the greatest tonic food in the world, the one preparation on which complete reliance can be placed to build up the tissues which are destroyed in many diseases, and thus to restore the lost weight which results from them. In order to do this, Sanatogen must first restore the blood to its best possible condition, for every part of the body derives its nourishment from the blood, while, at the same time, it revitalises the nervous system. It is thus evident that Sanatogen's power is not limited to one organ; but, by influencing the digestion, the nerves and the blood, it exercises a wide control over various conditions, and can ameliorate and cure a large number of symptoms.

Testimony to this power is further borne by *The Medical Press and Circular*, which says: "Sanatogen is readily absorbed by the stomach and has an immediate and remarkable effect, shown by a steady increase of body weight and of muscular strength and energy. At the same time, the colour is brought back to the patient's cheeks, which is due to a specific increase in the number of red corpuscles. Moreover, Sanatogen's feeding and sustaining properties are invaluable in the complete loss of appetite that often spells danger in attacks of influenza. To nourish the patient then becomes a matter of life or death, and under these circumstances the supreme importance of highly nutritive and absorbable food in small bulk is recognised. Sanatogen further supplies the much needed nutrition to the brain cells as well as the necessary filip to heart, stomach, liver and other organs of the body."

Write for a copy of a most interesting booklet, "The Art of Living," by Dr. Andrew Wilson, which will be sent, free, to all mentioning this paper on application to A. WILKING & Co., 6, Kiukiang Road, Shanghai.

Sanatogen can be obtained of all Chemists.

MOTOR LINERS.

THE SHIPS THAT DO NOT NEED COAL.

[BY T. THORNE BAKER, F.R.S., IN THE "DAILY MAIL."]

Oil has proved itself more than ever a successful competitor of coal in the first run of the first motor liner, the *Selandia*, which with strange significance reached London from Copenhagen at the height of the coal crisis. A new type of vessel has appeared on the seas, with no funnels, and with masts only necessitated by the cranes for handling the cargo.

This pioneer ship of the East Asiatic Company is the first large vessel, designed for ocean trade, propelled by oil engines, and having a displacement of 9,800 tons may be classed fairly as a large ocean cargo boat. The ship is the outcome of progressive experiments which, started on a humble scale with internal combustion engines depending on oil fuel, have gradually become more important and more successful, and several months ago this enterprising shipping company to launch out with a fully fledged liner for work between Europe and the East.

Fitted with two eight-cylinder engines of the Diesel type, made by the enterprising firm of Burmeister and Wain, of Copenhagen, the *Selandia* is capable of developing over three thousand horse-power, and makes well over eleven knots when running on full speed. A thousand pounds of oil is used by the engines in an hour, but as the storage capacity for oil is about nine hundred tons, the vessel can easily carry sufficient fuel for a twenty-thousand-mile run at full speed. Probably during the present month the *Pionia*, the sister-ship to the *Selandia*, will be launched, and already several other vessels of similar and large size for ocean trade are under construction.

A SUCCESSFUL FIRST VOYAGE.

Nothing could have given more complete satisfaction as to the reliability of an oil-propelled ship than the trials of this unique liner. Besides being able to start at a few minutes' notice, she proved so well under control and her engines were so easily reversed that what might have been a nasty collision with the cargo steamer *Standia* was easily averted on the occasion of her first trials. On her voyage to London the ship had ideal conditions for putting the performance of her engines to a thorough test, as she encountered tempestuous weather and behaved splendidly. Those of us who, through the courtesy of the East Asiatic Company, will be permitted to make the trip on her to-morrow from London to Antwerp will certainly have an experience worthy to be treasured up in the future which is to witness the struggle for supremacy between coal and oil substitutes.

What are the advantages of the motor liner, may be asked by the layman, apart from the question of the world's coal supply becoming exhausted during the next two or three hundred years? In the first place, the space required for fuel is very small compared with coal, and the oil can be taken in at an immense speed by means of pipes leading to the bunkers. The bunkers, by the way, can be of any odd shape, so that much of the odd space at present almost useless in a ship can be employed for the storage oil. Boiler space is unnecessary, and as the oil goes so much further than coal, the extra cargo or number of passengers that would be carried would mean a far greater earning capacity for the ship; something like three-fourths of the engine-room staff would be dispensed with.

Oil for internal combustion engines can be obtained from between 34s. and 40s. a ton, and besides occupying only about one-fourth of the bunker space required for coal, the cost of running—for moderate speeds, at any rate—is only something like a third of that holding good for steam reciprocating engines.

Apart from the money-saving side of the question, it is interesting to note that even large oil engines run very steadily, and there is, of course, no smoke—both points which the passenger will appreciate to the fullest extent.

RAPID PROGRESS IN ENGINE BUILDING.

The chief point in connection with motor liners is that during a very small number of years remarkable strides have been made in the construction of large engines; with the successful increase in size, economy still appears paramount, and economy is very much needed in view of the great competition between shipping companies. Five years ago the largest internal combustion engine running was of only 450 horse-power, now the horse-power is beginning to run into several thousands. The *Selandia*, and her two sister-ships when ready, should pave the way to the general adoption of internal combustion engines for ocean cargo work; it remains for engineers to improve their construction as rapidly and as successfully as they have done in the past, and fast passenger liners will follow as a natural sequence.

Considering the supremacy of Great Britain in matters maritime, it is a little astonishing that the great bulk of the pioneer work in connection with oil-driven ships is being done on the Continent. One instance of our own industry in this respect is a ship now building on the Clyde, of 5,000 tons, 3,000 horse-power, but from the information that is available it would appear that to one oil-ship of any size being built in Great Britain, there are many being constructed abroad—chiefly on the Continent.

A 14,000-ton liner is under construction in a German shipbuilding yard, so that ships of the *Selandia* class will be small craft compared with later oil-propelled vessels. When we look at the jump from the *Vulcanus*, of 2,000 tons, which has been running to and from the Black Sea for some time, to the *Selandia*, and then contemplate this 14,000-ton vessel, it will be very obvious what immense and rapid strides are being made in the size of coal-less ships. The Diesel engines for these ocean-going liners are, of course, of relatively low horse-power. Let us see now what is being done in the way of the far more powerful engines above hinted at, such as would be suitable for battleships or fast passenger vessels. A six-cylinder engine has been designed at

Nuremberg of something like 12,000 horse-power, and when built it is proposed to install it in a German battleship. A successful engine on these lines has been already constructed of moderately large horse-power for a Hamburg-American liner. Several engineers of the German Navy are already studying the construction of these engines at one of the principal Continental marine engineering works.

OIL TO COST COAL.

Many experts who have dealt with the coal problem and the possible substitutes for coal have more or less ignored oil for some unaccountable reason. One has only to make a conscientious examination of the oil outputs from various parts of the world, including Scotland, to see the potentiality of this fuel, and when one bears in mind the much larger amount of energy that can be obtained from it, weight for weight, than is the case with coal, its significance becomes still more marked. According to a recent report of the *Liverpool Journal of Commerce*, there are at the present moment twenty-one new oil-carrying ships under construction at certain specified yards capable of carrying an aggregate of 219,000 tons of oil. We are only beginning to "tap" the world's oil at present, and there is every indication of its extended application and substitution for coal. Quite recently I saw at work in the north of England, at a ship-building works whose proprietors are themselves large colliery owners, several new oil furnaces on trial, which were giving every satisfaction. The day may not be very far distant when oil, pumped from the bowels of the earth by oil-driven machinery and conveyed to this country by oil-driven ships, may be used for the smelting and working of ores, iron and steel, for the building of fresh ships and their internal combustion engines.

Oil for internal combustion engines can be obtained from between 34s. and 40s. a ton, and besides occupying only about one-fourth of the bunker space required for coal, the cost of running—for moderate speeds, at any rate—is only something like a third of that holding good for steam reciprocating engines.

NOTICE TO CONSIGNEES.

FROM CALCUTTA, PENANG AND SINGAPORE.

THE Steamship

"GREGORY APCAR," having arrived from the above Ports. Consignees of Cargo are hereby informed that their Goods will be delivered from alongside.

Cargo impeding the discharge will be landed at once, at Consignees' risk and expense.

Cargo remaining on board after 1 P.M. of the 11th inst. will be landed at Consignees' risk and expense.

No Fire Insurance has been effected. Bills of Lading will be countersigned by the Undersigned.

DAVID SASSOON & Co., LTD., Agents.

Hongkong, 8th April, 1912. [552]

FROM EUROPE.

THE H.A.L. Steamship

"C. FERD. LAEISZ," Captain Selmer, having arrived, Consignees of Cargo are hereby informed that their Goods are being landed and placed at their risk in the hazardous and/or extra-hazardous Godowns of the Hongkong and Kowloon Wharf and Godown Co., Ltd., whence delivery may be obtained against Bills of Lading countersigned by the Undersigned.

Optional Cargo will be carried on unless notice to the contrary be given TO-DAY.

All Claims must be presented within ten days of the steamer's arrival here, after which date they cannot be recognised.

No Claims will be admitted after the Goods have left the Godowns, and all Goods remaining undelivered after the 11th inst. will be subject to rent.

All broken, chafed, and damaged goods must be left in the Godowns, where they will be examined on the 10th inst., at 9.30 A.M.

No Fire Insurance will be effected by us in any case whatever.

This Steamer brings on Cargo: Ex s.s. "Germania" from Gothenburg.

HAMBURG-AMERIKA LINE, Hongkong Office.

Hongkong, 5th April, 1912. [548]

POST OFFICE NOTICE

Only fully prepaid Letters and Post Cards are transmissible by the SIBERIAN ROUTE TO EUROPE.

Letters for this route should be superscribed via SIBERIA.

The Parcel Post system to the following places in China is for the present suspended: Hupei, Hunan and Tientsin.

The China, with the American Mail, is due to arrive here to-day.

The *Delta*, with the English Mail, left Singapore on Sunday, the 7th inst., at 10.30 a.m., and may be expected here to-morrow, at 6 p.m. This packet brings parcel mails closed in London for despatch by the sea route on the 6th March, and for despatch overland on the 13th March.

The *Delta*, with the Siberian Mail, is due to arrive here on Friday, the 12th inst.

The American Mail, ex Manchuria, is expected to arrive here per German Mail Steamer *Lutetia*, on Tuesday, the 16th inst.

WINE MERCHANTS,

12, QUEEN'S ROAD CENTRAL, HONGKONG.
Telephone No. 135.

TOASTING BY ELECTRICITY.

Toast can be made by our Electric Toaster quicker, cleaner and cheaper than by any other method.

TOAST IN ONE MINUTE, after switching on for about 2 minutes to allow the Toaster to warm up toast can be made in about 1 minute, the toast is crisp—hot and brown, free from all black marks and without that unpleasant taste of fumes, inseparable from the use of coal or gas fires.

LOW COST—the current consumption for one meal is infinitesimal, used for one hour continually the consumption is only half a unit.

We carry large stocks of other Heating and Cooking specialties such as—Kettles, Saucepans, Hot Plates—Irons, Glue Pots—Soldering Irons—Shaving Pots, etc., etc. A visit to our showroom is requested.

WILLIAM C. JACK & CO., LTD.,

ELECTRICAL AND MECHANICAL ENGINEERS,

14, Des Vaux Road Central, Hongkong.

PRINTING

Nothing creates such a good impression in business as the use of First Class Printing. The difference in cost between good and bad printing and material is generally nil.
